Hey Jason,

When was the Continental permit issued? It doesn't look like our permits' database has been updated to include the final permit.

I don't have any additional comments at this time.

David,

Here is our "final" draft for Continental. We are prepared to issue the permit this week (public notice ended on October 4). This draft also includes expanded testing language that we discussed. We took this approach (method 25A with ethanol as calibration gas)

because the exhaust is about 95% ethanol. Do you have any additional comments?

Thanks.
